

The website I am redesigning is the course website for COSC 3p94 (introduction to human interaction) a course on how to design proper UI. Here is the link <https://www.cosc.brocku.ca/~bockusd/3p94/3p94.html> (This is the actual website for a course on UI design). The new layout will be similar to sakai as that was a well done website. There are many problems with the current website. First thing that will change is the background colour as that is very hard on eyes and isn't the best contrasting colour that could be chosen, instead white will be the background color. Next change will be to get rid of any old clip art that contributes nothing to the page. In addition, keep the formatting for information consistent instead of random bullet points, paragraphs and tables. Lastly, the page will be aligned properly on all browsers even if it's viewed on mobile or a different sized monitor.

Item #1 Header

Description: Header

Font: Arial 30px Black

Color: Red

Alignment: top (text centered)

Media: Brock logo

Interactivity: can click the brock logo to go back to the home page
